OBJECTIVE

I am a self-motivated Electronics and Communication Engineering fresher interested in embedded system, digital electronics and programming, seeking an opportunity to apply my skills to contribute effectively to the organizational goals.

EDUCATION

- **B.E. Electronics and Communication Engineering** 2022-2026
  University College of Engineering Kanchipuram
  8.25 CGPA
- **HSC** 2022
  Government higher secondary school, Vadailluppai
  88.6%
- **SSLC**
  Government higher secondary school, Vadailluppai 2020
  93.4%

SKILLS

MS Office
C programming
Tools: Quartus, MATLAB, MODELSIM
Digital Electronics
Embedded system: Handling Arduino, Raspberry pi and sensors

MINI PROJECT

SMART WASTE SEGREGATION SYSTEM

- Developed an Arduino based smart waste segregation system using sensors to identify wet, dry and metal waste.
- Used Arduino to process sensor inputs and automate sorting using servo and stepper motors.
- Improved waste management efficiency through real-time detection and automated classification.

INTERNSHIP

EMBEDDED SYSTEM WITH IOT APPLICATION **MAY 2025 – JUNE 2025**

- I have completed my internship in embedded systems at GB tech crop, Chennai.
- During internship I learned C programming for embedded system development, communication protocols like UART, I2C, and SPI.
- Worked with ESP8266 controller for IoT-based applications. Completed a project integrating sensors and cloud connectivity via Wi-Fi.
- Gained hands on experience in data monitoring, cloud integration and device connectivity.

CERTIFICATIONS

- 4G and 5G Networks – Naan Mudhalvan
- IC chip design and verification semiconductor-Naan Mudhalvan
- Embedded system for IOT application using Raspberry Pi -Naan Mudhalvan

SOFT SKILLS

- Quick learner
- Time management
- Team collaboration & Adaptability

LANGUAGES

- Tamil
- English
